

LAB CORONA TREATER

The **Lab Corona Treater** is designed for research and test laboratories as well as low volume production. This apparatus increases the surface energy of the substrates and is very useful to ensure adhesion of inks, glues and coatings on substrates. IEEC tabletop Lab Corona Treater is equipped with ceramic electrodes which enables it to treat variety of substrates including nylon, vinyl, PVC, PET, metallized surfaces, foils, paper, paperboard stock, and other materials. It treats substrates up to A4 Size.

GENERAL SPECIFICATIONS:

Substrate Materials	: Metallised & Non-metallised
Substrate Size	: A4 (210 mm x 297 mm)
Substrate Thickness	: 12 TO 200 μ
Treatment	: Single Side

AVAILABLE MODELS

1. Lab Corona Treater with motorized reciprocating station.
2. Lab Corona Treater with manual reciprocating station.
